DETAILED ACTION

1. This is in response to the amendments filed 9/10/2009.

Allowable Subject Matter

2. Claims 22, 25-31, 35, 37, and 40-46 are allowed.
3. The following is an examiner's statement of reasons for allowance:
 - a. **Regarding claim 22**, the prior art of the record does not anticipate or make obvious the applicant's method of cleaning a surface of a conductive layer on a semiconductor using a hydrogen, helium, and argon plasma in a process wherein a via is opened in a dielectric and the plasma cleans the conductive layer such that residual organic material on the conductive layer is plasma ashed and the surface of the exposed conductive layer is reduced.

Lin et al., US PGPub 2006/0099802 teaches using a plasma selected from the group of hydrogen, argon, oxygen, or helium for dielectric pore sealing treatments, however not of the combination of the three elements.

Pan et al., US PGPub 2004/0023485 A1 teaches using a 2 plasma etching for improved surface adhesion in low k dielectrics, however not the combination of argon, hydrogen, and helium as in the applicant's method for use in plasma ashing of a conductive surface in the via.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
